PROKILL

kills insects fast!

Safe, natural insect control without disruption to your business

- **High impact, intense strength** – kills insects fast
- **Continuous protection** – helps to prevent the spread of bacteria that cause illness and promote best hygiene standards
- **Low doses of concentrated formulation automatically dispensed** – safe to humans but deadly to insects
- **Low toxicity** – safe to use in areas where food is stored, prepared and served
- **3000+ sprays per refill** – gives 30+ days continuous bug control 24/7
- **Effective in rooms up to 168 m³ / 6,000 ft³**

Top Tip: Set to operate overnight, when many insects are at their most active, for overnight room clearance

How *ProKill* works

Mosquitoes and flies carry disease organisms that can cause serious illness and even death if passed on through contaminated food. **ProKill** is a pyrethrum-based insecticide than is delivered through an automated dispensing unit providing protection and insect control round-the-clock or at pre-selected times.

Pyrethrum is a natural insecticide derived from the Chrysanthemum flower and is one of the least toxic to mammals. As with any product, carefully read and follow the label precautions and instructions for use.

Suitable for use

Indoors, in food factories, food storage areas and catering establishments including handling areas of milk, cheese and ice-cream plants.

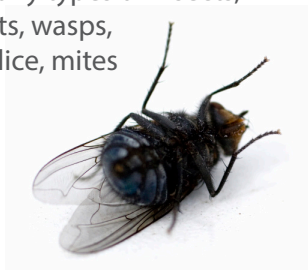

In public buildings such as hotels, offices, warehouses, schools, hospitals (although not recommended for use in occupied ward areas).

In animal husbandry e.g. kennels.

ProKill is effective against many types of insects, including flies, fleas, ticks, ants, wasps, hornets, bedbugs, silverfish, lice, mites and mosquitoes.

ProKill Maxi refills are...

Compliant, labels meet new REACH regulations, supported by reliable technical specifications

Environmentally responsible with potential hazards clearly labelled

ECHA registered materials and components used in this product

Seamless aluminium can, ultra safe when filled, stored and in use. Fully recyclable after use

Customised Insect Control

Flexible programming options according to what the room is used for and when, the size of room, the degree of infestation and factors affecting air flow, such as air conditioning or extractor fans.

Choose Dispenser...
