## verzendgegevens

### consumentenunit

EAN	7322540159998
stuks	136
materiaal	Carton
hoogte	130 mm
breedte	85 mm
lengte	212 mm
volume	2.3 dm3
nettogewicht	353 g
brutogewicht	359 g

### pallet

EAN	7322540175257
stuks	91392
consumentenunits	672
hoogte	1966 mm
breedte	800 mm
lengte	1200 mm
volume	1.8 dm3
nettogewicht	237.15 kg
brutogewicht	261.06 kg

### transportunit

EAN	7322540160000
stuks	2856
consumentenunits	21
materiaal	Carton
hoogte	227 mm
breedte	406 mm
lengte	608 mm
volume	56.0 dm3
nettogewicht	7.41 kg
brutogewicht	8.16 kg

## milieu

### Content

The fibre composition in the product is virgin and recycled

### Material

Virgin fibres and recovered paper

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

### Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent Dry strength agent If coloured = Dye Fixing agents Fluorescent whitening agent Glue = if used The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid

### Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes Fulfilment of essential requirements: Yes Environmental label = Ecolabel This product is approved for Swan label, licence 305.049.

Date of issue 2007-03-08 Art.no 120288

Revision date 2009-07-23

### Production

## Tork Advanced Hand Towel Interfold Soft

---

This product is produced at Kostheim mill, Germany. Kostheim mill is certified according to ISO 14001 and EMAS.

### **Destruction**

This product is mainly used for personal hygiene and can be collected together with household waste. The packaging can be used for material recovery or energy recovery
